DSD 9/Architecture – Reporting Database

The below figure shows the architectural layout of data sources and the movement of data via the Extract, Transform and Load (ETL) scripts that are scheduled as a batch job to run based on a trigger or on a periodic basis.

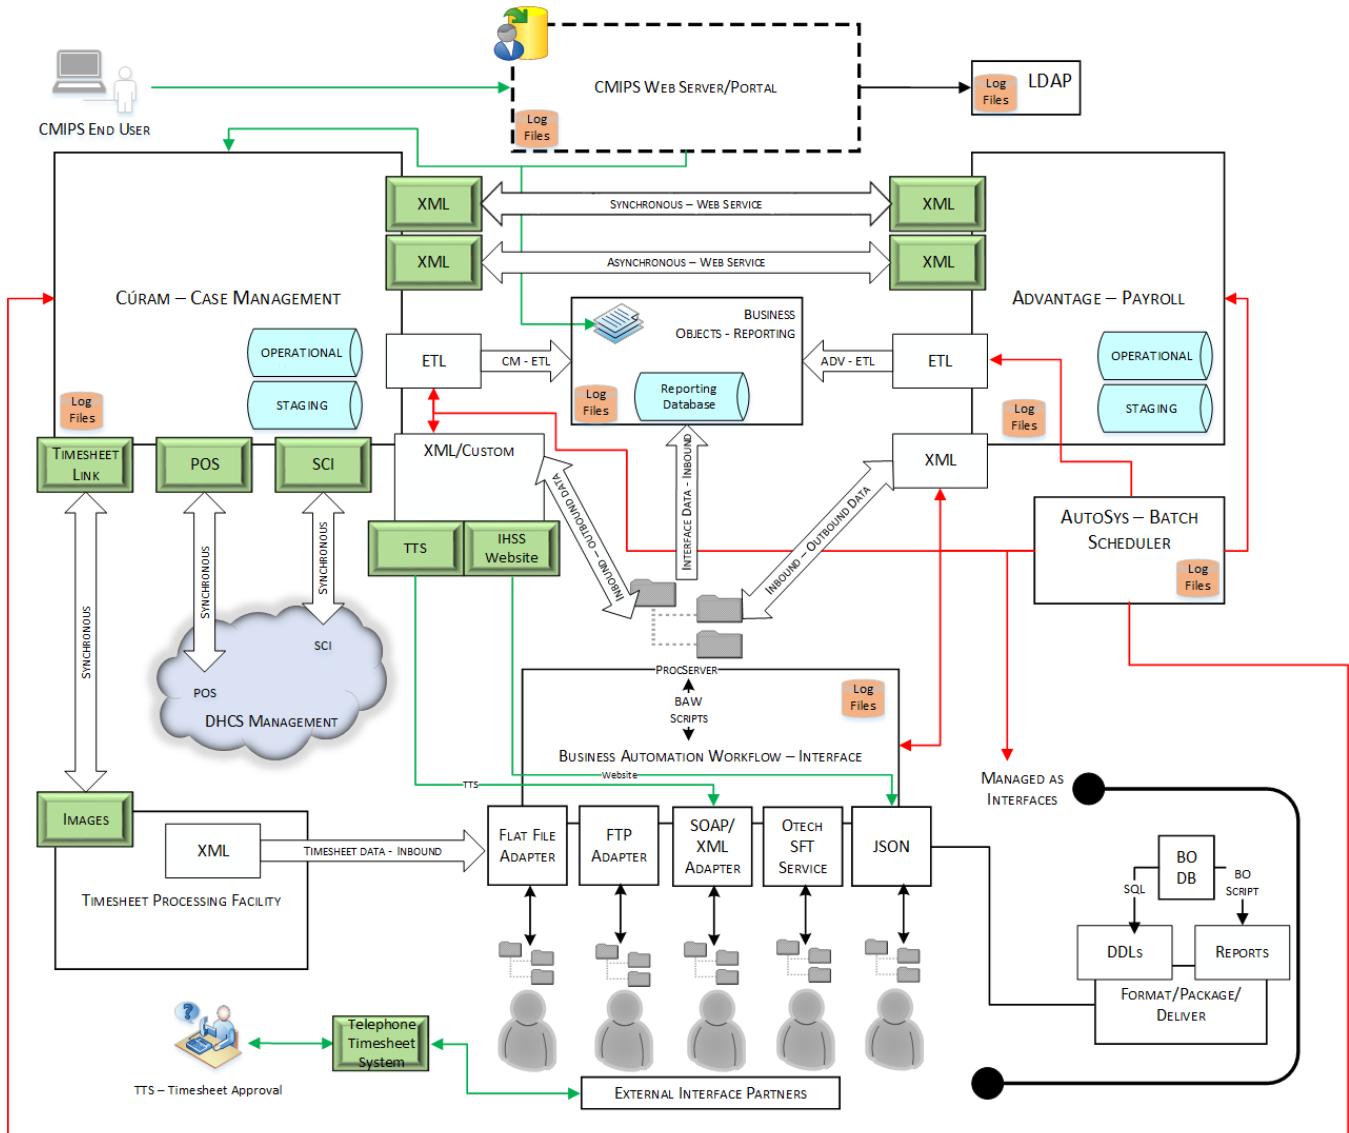

Figure – CMIPS Data Sources and Movement

Note: The details of the ETL schema are listed in the data element tables in [DSD 9/Architecture – Reporting Database/Business Process/CGI ETLs](#).

DSD 9/Architecture – Reporting Database/Reporting Database Topic Area

The data elements of the Reporting Database were developed in the following methodology:

1. List all reports with the data elements.
2. Trace to one or more BusinessObjects Database tables.
3. Trace to a single master data element (Cúram, Advantage or other system).
4. Make a unique name for master data element in the BusinessObjects Reporting Database.
5. Fill in data field attributes, unique name and source.
6. Validate that report definitions are not in conflict.
7. Repeat Steps 1 to 6 from screens, forms, legacy data download files and external interfaces.
8. Create the data dictionary in Erwin.
9. Use this list to determine the data elements for the CMIPS Query and Sampling Tool (QST).
10. Use this list to determine the data elements for the CMIPS data download files.
11. Design the Entity Relationship Diagram (ERD) in Erwin.
12. Add to the Database Design Description (DDD) document.

DSD 9/Architecture – Reporting Database/Business Process

DSD 9/Architecture – Reporting Database/Business Process /Business Process Functions

There are no business functions directly associated with the design of the BusinessObjects Reporting Database.

DSD 9/Architecture – Reporting Database/Business Process /Screen Designs

There are no screens associated directly with the design of the BusinessObjects Reporting Database.

DSD 9/Architecture – Reporting Database/Business Process /Navigation Elements

The following navigational links will be displayed in the left navigation menu for the Web portal menu:

Left Navigation Menu	Description
Home (Non-Secure)	Displays CMIPS Web Portal home screen prior to Logon
Log On	Displays CMIPS Logon screen
Reset Password	Displays the Reset Password screen
General Help	Displays General Help screen
CMIPS Notifications	Displays any Notification screen
CMIPS Contacts	Displays CMIPS Contact screen
CMIPS Web Portal Home (Secure)	Displays CMIPS Web Portal Home screen
Reset Password	Displays Reset Password screen
Maintain Account Information	Displays User Account Information screen

Tasks	Displays CMIPS Tasks screen

DSD 9/Architecture – Reporting Database/Business Process /Error Messages

There are no error messages directly associated with the BusinessObjects Reporting Database except those for normal ETL Batch processing and DB2 database operations. The batch job errors are captured in "Scheduled Batch Exception Report" and published.

DSD 9/Architecture – Reporting Database/Business Process /Business Rules

There are no business rules directly associated with the Reporting Database.

DSD 9/Architecture – Reporting Database/Business Process /Tasks and Notifications

There are no tasks or notifications directly associated with the BusinessObjects Reporting Database except for a batch jobs status that will be covered in the Operations Plan.

DSD 9/Architecture – Reporting Database/Business Process /Internal Interfaces

There are no Internal Interfaces.

The figure below shows the flow of data from the operational databases to the Reporting Database. The ETL scripts are run and scheduled by the DB2 data warehouse CWA tools.

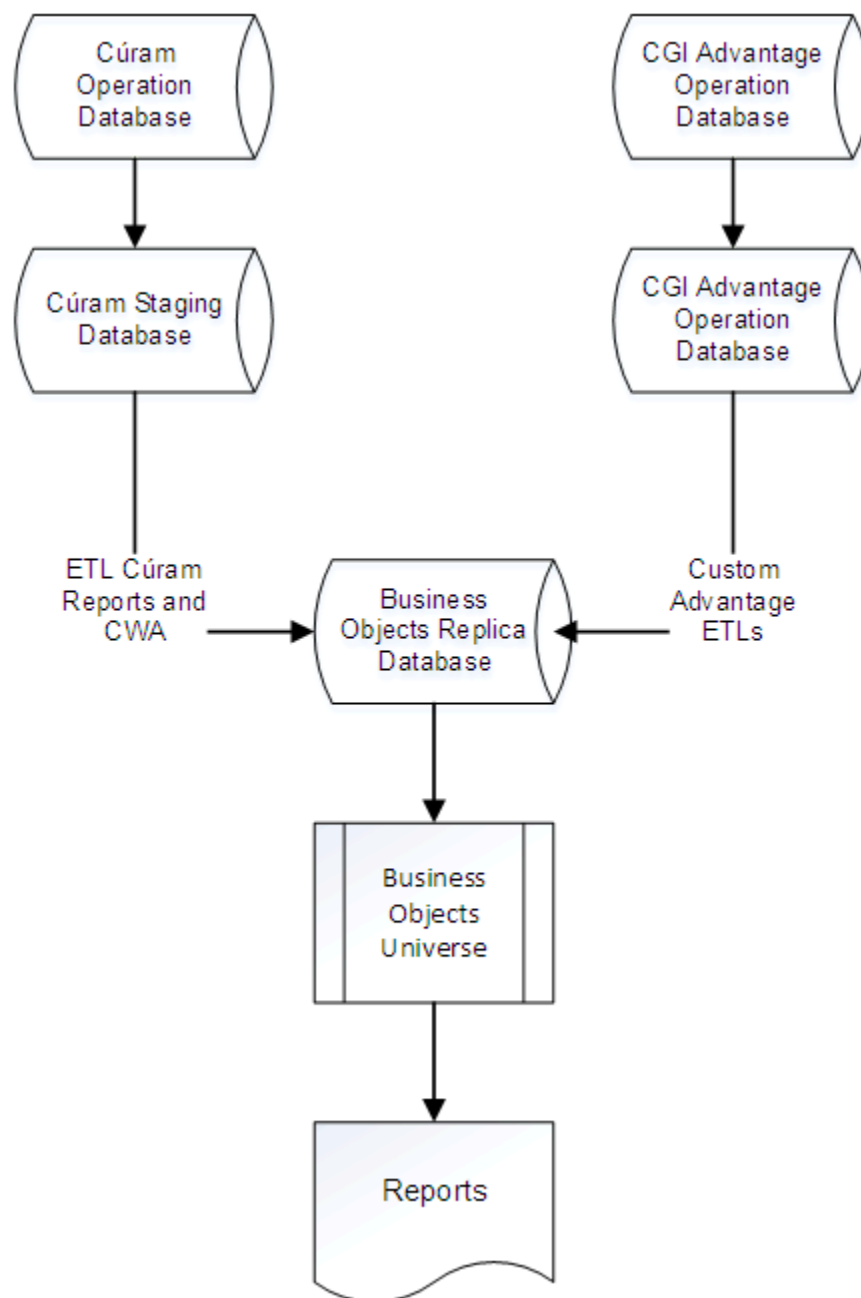

Figure – ETL Data Flow

There are two internal interfaces, one from Payroll (CGI Advantage) and one from Case Management to the BusinessObjects Reporting Database.

The remaining interfaces for the Reporting Database are commands that are run on the physical servers and then the resultant data is transferred to the BusinessObjects Reporting Database via a combination of AutoSys and Business Automation Workflow (BAW) batch jobs.

The ETLs in the next section are used to break up the data transformation by usage in the Reporting Database.

DSD 9/Architecture – Reporting Database/Business Process /CGI ETLs

For further ETL detail refer to: 4.1.4.2 Database Design Description (DDD) – Appendix F - Data Dictionary (Non-COTS) – Reporting Database.

DSD 9/Architecture – Reporting Database/Business Process /External Interfaces

The Reporting Database DSD does not have any external interfaces.

DSD 9/Architecture – Reporting Database/Business Process /Batch Processing

Batch Process Name	CI	Description	Estimated Size (Records)	Frequency	Send Receive Maintenance
Cúram ETL	 CI-116671 - DSD BTCH pro ops cm etl load IMPLEMENTED	Transfer Data from the Operational Cúram Database to the Reporting DB	Change Records per day	Daily	Maintenance
DSD_Batch_Advantage ETL	 CI-116670 - DSD BTCH Advantage ETL IMPLEMENTED	Transfer Data from the Operational Advantage Database to the Reporting DB	Change Records per day	Daily	Maintenance

For specific ETLs relating to the information being transferred to the Reporting Database, please refer to the following document: 4.1.4.2 Database Design Description (DDD), Version 2 – Appendix F - Data Dictionary (Non-COTS) – Reporting Database.

Refer to DSD Appendix A for Security Roles.

DSD 9/Architecture – Reporting Database/Business Process /Reporting

The BusinessObjects Reporting Database houses the data elements for all system requirements reports and operational reports as outlined in various plans, as well as the program management reports. The reporting database itself does not have any reports but rather the reports used to define the database and associated ETLs. The ETLs are listed below. These reports are defined in the respective GSD by topic, refined in DSD and then modified by respective change requests, where applicable.

DSD 9/Architecture – Reporting Database/Business Process /Reporting/Reports Required to Support SyRS Reporting Requirements

As described in Section 8, CMIPS shall support the data exchange from the CMIPS environment to the Contractor's Print Center for print services. The following business reports will be supported by the BusinessObjects Reporting Database.

Each CMIPS report shall print County branch office-specific static information and/or a signature block on certain forms as required by the State Project Office.

No.	Case Management Reports	Description
1	Intake Tracking Report for Medi-Cal Determination	Online Search, Intake Tracking
2	Referrals by Source by County	Online Search, Intake Tracking
3	Monthly Leave Status Report	Provider Mgmt
4	PA Providers Report	Provider Mgmt
5	Provider Hours > 300	Provider Mgmt
6	Provider SSN Verification Report	Provider Mgmt
7	Timesheet Exception Report	Time & Attendance
8	No Timesheet Activity for 60 Days (1 by Social Worker, 1 by Provider)	Time & Attendance
9	Application/Approval/Denial/Termination Listing (Detail and Summary)	Case Maintenance
10	Authorized And Paid Report	Case Maintenance
11	Case Actions Overview	Case Maintenance

DSD 9/Architecture – Reporting Database/Business Process /Reporting/Reports Required to Support Architecture Track

The following Architecture Track reports will be supported by the BusinessObjects Reporting Database.

Topic	No.	Report Categories and Description
System Performance Administration	1	Network Availability Report
System Performance Administration	2	Server Availability Report
System Performance Administration	3	Network Utilization Report
System Performance Administration	4	WAN Transmission Workload by County and POP Report
System Performance Administration	5	Server Processor Utilization Report
System Performance Administration	6	Server I/O Workload Report
System Performance Administration	7	Server Disk Utilization Report (Summary & Detail)
System Performance Administration	8	Server Memory Utilization Report (Summary & Detail)
System Performance Administration	9	Database Transaction Volume Report
System Performance Administration	10	Web Services Transaction Volume Report
System Performance Administration	11	Timesheet Processing Report
System Performance Administration	12	Scheduled Batch Performance Report
System Performance Administration	13	Scheduled Batch Exception Report (See Operations Plan)
System Performance Administration	14	System Response Time Report – Detail & Summary
System Performance Administration	15	Golden PC User Response Time Report – Detail & Summary
System Performance Administration	16	System Transaction per County – Detail & Summary
System Performance Administration	17	System Outages Report
System Performance Administration	18	Service Ticket Management Report
System Performance Administration	19	Help Desk Ticket Inventory Report
System Performance Administration	20	Application Logging Report
System Performance Administration	21	Middleware Logging Report
System Performance Administration	22	Operating Alerts and Alarms Report
System Performance Administration	23	Backup Process Report
Data Retention	24	Purge Statistics and Records
Data Retention	25	Purge Records Restored from Online Archive
Data Retention	26	Histogram of Records awaiting Online Archive by Quarter
Data Download	27	Paid Hours
Data Download	28	Provider Hours Paid for Month
Data Download	29	Provider Eligibility (PELGDNLD)
Data Download	30	Recipient Eligibility A (RELADNLD)
Data Download	31	Recipient Eligibility B (RELBDNLD)
Data Download	32	Recipient Eligibility C (RELCDNLD)
Data Download	33	County Contractor (DataDwldCont) Report
Data Download	34	Inter County Transfer Report (DataDwldlct)

Data Download	35	Provider Management Data
Data Download	36	Recipient Management Data (Part 1)
Data Download	37	Recipient Management Data (Part 2)
Data Download	38	Recipient Management Data (Part 3)
Data Download	39	Recipient Management Data (Part 4)
Data Download	40	Timesheet and Payroll Mgt Data

DSD 9/Architecture – Reporting Database/Business Process /Reporting/Other Reports from Plans

There are other reports from plans as documented in this DSD deliverable. Since these reports from plans are artifacts of the CMIPS development, they will be managed as configuration items contained in the Jira tool.

These work products are separately delivered as part of CMIPS.

Plan	No.	Report Categories and Description
Capacity Management Plan	1	System Resources Report
Capacity Management Plan	2	Capacity Management Report
Capacity Management Plan	3	Storage Management Report
Capacity Management Plan	4	Excessive Transaction
Operations Plan	5	Operations Management Report
Operations Plan	6	Daily Production Status Report
System Security Plan	7	Interface Status Report (send/receive/status/date) (Operations Plan)
System Security Plan	8	Backup Status Report (backup status/date) (Backup and Recovery Plan)
System Security Plan	9	Security Incident Summary Report
System Security Plan	10	Un-authorized Attempts
System Security Plan	11	Failed Password Attempt Trend Report
System Security Plan	12	Expired Passwords
System Security Plan	13	System Password Expire Within 30 days
System Security Plan	14	System Password Change History
System Security Plan	15	Accounts that will become inactive within next 7 days
System Security Plan	16	Locked Out Accounts
System Security Plan	17	Inactive (greater 30 days) Pre—Expired Accounts
System Security Plan	18	In-Active Account Report
System Security Plan	19	Cúram Role Changes
System Security Plan	20	Roles Across All Applications
System Security Plan	21	Cúram Roles
System Security Plan	22	CGI Roles
System Security Plan	23	Business Objects Roles
System Security Plan	24	Portal Roles
System Security Plan	25	CMIPS ID and Roles
System Security Plan	26	CMIPS Account Management Activities Report (audit files from Cúram)
System Security Plan	27	CMIPS Account Change Report
System Security Plan	28	CMIPS Cúram Account Change Report
System Security Plan	29	CMIPS External Agency Information Disclosure Report
System Security Plan	30	CMIPS Security Testing Deficiency Report (TEMP)
System Security Plan	31	CMIPS Security Issue Report (Issue Management Plan)
System Security Plan	32	Security CMIPS Configuration Items Modification Report (Change Management Plan)
System Security Plan	33	Online Archive Statistics Report

System Security Plan	34	Audit Trail Report

DSD 9/Architecture – Reporting Database/Business Process /Forms

There are no forms in the Reporting Database DSD.

DSD 9/Architecture – Reporting Database/Code Table Definitions

There are no current code table definitions for the Reporting Database DSD.

DSD 9/Architecture – Reporting Database/Database Entities

Database entities are those elements used by reports, screens, external and internal interfaces. All of the reporting database tables, along with target report DB tables/columns names, source application names (Cúram/Cgi/Interfaces etc.), source tables/columns names and source ETL names that are directly mapped to the target report DB tables are mentioned in the DDD (Database Design Description) under the following:

- Section 5.2 Physical Database Design (Non-COTS) Reporting Database
- Appendix 4: Reporting ETL Tables (STAGING)
- Appendix 5: Reporting ETL Tables (CENTRAL)
- Appendix 6: Reporting Data Dictionary

DSD 9/Architecture – Reporting Database/Database Entities

/PERF.PM_URT_ESP

Table – Database Entity: PERF.PM_URT_ESP

Field Name	Field Type	Size	Null	Screen Name – Field Name	Comments
TRANS_NAME	VARCHAR	1000	No	N/A	N/A
START_DATE	DATE	NA	No	N/A	N/A
START_TIME	TIME	NA	No	N/A	N/A
PC_NAME	VARCHAR	50	No	N/A	N/A
WEB_NODE_NAME	VARCHAR	50	No	N/A	N/A
RUNTIME	DECIMAL	24, 2	No	N/A	N/A

DSD 9/Architecture – Reporting Database/Business Class Definitions

There are no business class definitions associated with the Reporting Database DSD.
